

POLYURETHANE STRINGER BAR CAPPING

Besides traditional capping rubber, we now supply newly developed Polyurethane Capping. It is designed to better protect the steel stringer bars supporting the screen cloths in vibrating screens. Polyurethane Screen Capping has excellent ozone, wear and impact resistance. Comparing with traditional capping rubber, the working life of Polyurethane capping can be up to 7 times longer in wear-life.

Colour: Orange
Hardness: 90 (Shore a)
Strength: 28.4 Mpa (Min)
