

FloMax™ - Poly

Advanced engineering groups latest product now coming to life with the new piano/harp with poly strips. We can manufacture the polyurethane stringers to suit any machine in 45 deg or 180 deg hooks. We can supply almost any specification of the standard piano wire screen within the following limits:-

1. Apertures between 1.5mm – 46.0mm
2. Wire thickness between 1.2mm – 8.0mm
3. Max length – 1800mm
4. Max width – Unlimited O/H

*High Tensile & Stainless Steel Wire Available

FLOMAX™
HARP SCREENS ANOTHER QUALITY AEG PRODUCT

* Polyurethane Hardness – 85-90 Shore

All FloMax™ - Poly screens are factory tested and are designed to maintain a 'True' aperture. We are also able to vary the hooks to suit all tension bar setups.

Benefit to using polyurethane over plastic or steel spacers is it can withstand more impact and the wear life around the stringer/spacer area is 2-3 times greater.
