

Magnetic Rubber Liners

AEG magnetic rubber liners are designed for the ease of maintenance on areas receiving large feed size to maximise wear life. As simple as just placing the rubber panel onto the steel area you want to protect from the impact of material. With the shore hardness being the same as a tension cloth (60 Duro) these will outlast steel 2-4 times over depending on material/feed size hitting the liners.

Sizes in stock:

Rubber Magnetic Liners 610mm x 305mm x 25mm thick

Rubber Magnetic Liners 610mm x 305mm x 50mm thick

Benefits:

- Superior ABRASIVE wear resistance
- Superior IMPACT resistance and resilience
 - Ease of handling & installation
 - No permits required
 - No tools required
 - Flexibility
 - Noise reduction
