

Screening Spray Nozzles

AEG Spray Nozzles work equally with high or low water pressure having an operating range from 30 to 300 kPa (4 to 40 PSI). The nozzles give us a sharply defined, fan-shaped water jet providing efficient washing. AEG spray nozzles are ideal for washing, dust control and de-slurrying applications.

White/Grey	3.0mm
Green	5.0mm
Blue	7.0mm
Yellow	9.0mm
Red	11.0mm

*All have 3/4" BSP Thread
