

PUNCH PLATE SCREENS

AEG can provide a large range of Perforated Metals and there are almost no limitations to the design, shape and metal type that can be provided. Profile Shapes include round, square, rectangular, hexagon/diamond and slotted. Hardox, Bissaloy and Mild steel options all available.

Advantages of correct apt type, steel type and steel thickness for the job:

- Get Longer Screen Life.
- Excellent Screening Frequency.
- Less Chance of Blinding.
- More Accurate Screening.
